Customizing Your Dreams
Quality Custom Cabinetry

The 'Factory Direct' Advantage

"I made a decision years ago that I want to know my customers. While most custom cabinet companies will only allow you to purchase their product through a dealer... aka... middleman, I believe a hands-on approach is the best way to connect with my customers. After all, you are inviting us into your homes, and our cabinets will be a part of your lives for many years to come. This is both an honor and privilege, so I want you to know the people who are building your cabinets. We've built kitchens for over 5,500 families... and I've had dinner in many of those kitchens after they were installed."

- Chris Graber, president and founder of Cabinets by Graber

We are one of the few custom cabinet manufacturers who allow you factory direct access to the manufacturer. You will have direct access to the skilled craftsmen building your cabinets and you are welcome to speak with them as often as you wish. In fact, you are also welcome to pay us a visit and personally meet the folks who will be making your cabinets. While you are here, you can tour our showroom and factory, and see our skilled Amish craftsmanship for yourself.

*T*hank you for considering Cabinets by Graber as your custom cabinet maker! Cabinets by Graber is a Christian family business built on the foundations of the Bible and the cornerstones of trust, integrity, competence, quality, vision, and conviction. At Cabinets by Graber, we believe sometimes you must take the long road. While a shortcut may be easier, it is not always the best option.

We build our custom cabinets the old-fashioned way, one at a time, using construction methods that date back many centuries. We value and employ time-honored traditions such as furniture dovetail construction on all four corners of our drawer boxes, yet appreciate the advances in modern technology. While having a great product is certainly important, equally as important is how we serve you. We appreciate the opportunity to serve you and do not take it for granted. It is our job to make sure you are satisfied throughout the entire process.

Plywood Construction

At Cabinets by Graber, we use select materials to build the foundation of your cabinets. Graber cabinet boxes feature a veneer core hardwood plywood interior. We use first-quality $\frac{3}{4}$ " plywood to ensure your cabinets will be sturdy and strong for generations of use.

Frame Construction

Accuracy and precision are paramount when constructing your cabinet frame. The frame determines how your doors and drawers fit and affects the functionality of your cabinets over time. We understand there is no room for forgiveness here, so we double dowel your cabinet frames with two wooden dowel pins in each corner, to ensure accuracy and sturdiness.

Door Construction

Cabinet doors must not only be aesthetically pleasing, but they also must be built to perform. Each joint has a single wood dowel for reinforced support. In addition, the precision of the traditional mortise and tenon joinery ensures strong unbreakable joints. Cabinets by Graber is one of the few custom cabinet makers who go the extra mile to provide you with top quality construction throughout. Our lumber meets stringent quality requirements. We reject lumber that doesn't meet our standards for moisture content, color consistency and grain pattern consistency.

Drawer Construction

Drawers are subject to heavy usage so we make certain they will last for generations to come. We use the highest quality hardware available and time honored construction methods to ensure the longevity of the pieces.

Our thick and sturdy $\frac{5}{8}$ " maple drawers are furniture dovetailed on all four corners, providing you with maximum strength. We hand sand the edges for a satin-like feel to the fingertips.

Maximizing your space is important. We outfit our drawers with top-quality, invisible, undermounted drawer guides that include full extension and self/soft-closure. Our undermount guide system is the best on the market.

Finishes

Our finishes are second to none. Each cabinet is hand sanded to provide a silky smooth finish. We still wipe all of our stains by hand to bring out the beauty and clarity of the wood. We offer a wide variety of paints, hand brushed paints, glazes and antique reproduction finishes. We apply a catalyzed conversion varnish which is a "water clear" mar and moisture resistant finish. If you can dream it, we can create it.
